SUMMARY

- Some professional web development experience.
- Associates degree in software engineering (Graduated on the Dean's list).
- Senior, computer science major, at Oakland University (About a year until graduation).
- Strong in Java, JavaScript, HTML/CSS, and relational database implementation.
- Honorably discharged from the Michigan Army National Guard. Managed several lower enlisted soldiers, responsible for thousands of dollars' worth of equipment.
- Knowledgeable in electrical assembly and soldering. Some experience with quality control and electrical continuity/voltage testing.

OBJECTIVE

Highly motivated, fast learner and able to think outside of the box, with the hopes to obtain an internship with Kors Engineering. My primary focus has been in object oriented programming, and font end functionality. In addition, a knowledge on the model view controller and the layers that go with it. A veteran of the U.S. Army National Guard, just recently honorably discharged. Especially skilled at building effective, productive working relationships with other staff members and finishing tasks in a timely manner.

ADDITIONAL SKILLS AND ACCOMPLISHMENTS

- Proficient in a number of object oriented languages, such as (in order of proficiency): Java, C#, and C/C++.
- Knowledgeable in creating MVC web applications with Enterprise Edition Java and .NET ASP Core.
- Knowledgeable in several languages, in terms of client side functionality, such as: JavaScript/JQuery, PHP, JTSL, Expression Language, and the use of grid systems (e.g. Bootstrap/Materialize).
- Well versed in using HTTP request such as, GET and POST request with third party APIs. Primarily experienced with JSON, but just as capable with XML.
- Competent in the use of HTML /CSS, and manipulating the DOM with JavaScript/JQuery. Additionally, capable in the usage of Jade, an HTML pre-processor, for increased productivity.
- Competent in developing CMS based web applications, specifically WordPress. Has developed WordPress themes using PHP, well-practiced querying their database.
- Experienced in connecting, querying, and developing relational databases (i.e. using JDBC, .NET, PHP, etc.). Most database usage/experience, thus far, has been doing CRUD queries and sorting the data presented to the user.
- Well versed in data structures, and always considers performance when approaching any development task.

PROFESSIONAL HISTORY

- **U.S. Army National Guard –** Team leader, with a notable level of responsibility. (*2011 – 2017)*

- Direct Connect Systems – Electrical assembler, with a number of trade specific skills. Honed my skill at soldering, and my understanding of the manufacturing life cycle/process. (*2014 – 2015*)
- Power Solutions International – Electrical assembler, with a number of trade specific skills. Migrated company assets, and implemented inventory management system and manufacturing life cycle/process, which was adopted as their standard for building jobs. (*2013 – 2014*)

EDUCATION

- Currently pursuing my bachelor's degree in Computer Science at Oakland University, for computer science. Present academic standing is academic honors. (About a year left)
- **Associates degree in Applied Science (Software Engineering) –** Graduated from Oakland Community College, where I displayed a high level of academic excellence, which secured my position on the Dean's list. (*Winter 2016*)
- High school diploma – Attained from Lakeland high school, where I started my reputation of, consistently displaying, academic excellence. (*2010*)
